## Financial Information; Non-GAAP Financial Measures

Our financial statements, including net income (loss), are prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”).

To provide investors with additional information regarding our financial results, we have disclosed EBITDA, Adjusted EBITDA, and Adjusted EBITDA Margin, all of which are non-GAAP financial measures that we calculate as net income (loss) before interest, taxes and depreciation and amortization expense in the case of EBITDA and further adjusted to exclude stock-based compensation, change in fair value of warrant liability, legal settlements and other legal costs, reduction in force, asset impairment charges, loss contingency, change in TRA liability and other non-cash, unusual and/or infrequent costs in the case of Adjusted EBITDA. Adjusted EBITDA Margin is calculated as a ratio of Adjusted EBITDA to Revenue and expressed as a percentage. Refer to page 11 for a reconciliation of net income (loss) (the most directly comparable GAAP financial measure) to EBITDA; and from EBITDA to Adjusted EBITDA.

We present EBITDA, Adjusted EBITDA, and Adjusted EBITDA Margin because these metrics are key measures used by our management to evaluate our operating performance, generate future operating plans and make strategic decisions regarding the allocation of investment capacity. Accordingly, we believe that EBITDA, Adjusted EBITDA, and Adjusted EBITDA Margin provide useful information to investors and others in understanding and evaluating our operating results in the same manner as our management.

EBITDA, Adjusted EBITDA, and Adjusted EBITDA Margin have limitations as an analytical tool, and you should not consider these non-GAAP financial measures in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are as follows:

- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and EBITDA and Adjusted EBITDA do not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;
- EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, our working capital needs; and
- EBITDA and Adjusted EBITDA do not reflect tax payments that may represent a reduction in cash available to us.

Because of these limitations, you should consider these non-GAAP financial measures alongside and not as a substitute for other financial performance measures, including net income (loss), our GAAP expenses, and our other GAAP results. For more information on these non-GAAP financial measures, please see the section titled “Non-GAAP Reconciliations: Net Income (Loss) to EBITDA and Adjusted EBITDA” included at the end of this presentation and the footnotes provided for such non-GAAP measures.
