Use of Non-GAAP Financial Measures

Our financial statements, including net income (loss), are prepared in accordance with principles generally accepted in the United States of America ("GAAP").

To provide investors with additional information regarding our financial results, we have disclosed EBITDA and Adjusted EBITDA, both of which are non-GAAP financial measures that we calculate as net income (loss) before interest, taxes and depreciation and amortization expense in the case of EBITDA and further adjusted to exclude stock-based compensation, change in fair value of warrant liability, transaction related bonus, legal settlements and other legal costs, discharge of holdback obligation related to prior acquisition, reduction in force, impairment of right-of-use asset and investment securities, transaction costs, change in tax receivable agreement liability and other non-cash, unusual and/or infrequent costs in the case of Adjusted EBITDA. Below we have provided a reconciliation of net loss (the most directly comparable GAAP financial measure) to EBITDA; and from EBITDA to Adjusted EBITDA.

We present EBITDA and Adjusted EBITDA because these metrics are a key measure used by our management to evaluate our operating performance, generate future operating plans and make strategic decisions regarding the allocation of investment capacity. Accordingly, we believe that EBITDA and Adjusted EBITDA provide useful information to investors and others in understanding and evaluating our operating results in the same manner as our management.

Each of EBITDA and Adjusted EBITDA has limitations as an analytical tool, and you should not consider any of these non-GAAP financial measures in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are as follows:

- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and EBITDA and Adjusted EBITDA do not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;
- EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, our working capital needs; and
- EBITDA and Adjusted EBITDA do not reflect tax payments that may represent a reduction in cash available to us.

Because of these limitations, you should consider EBITDA and Adjusted EBITDA alongside other financial performance measures, including net loss and our other GAAP results.

Definition of Key Operating and Financial Metrics

- Average Monthly Revenue Per Paying Client: Average monthly revenue per paying client measures how much clients, for the period of measurement, are willing to pay us for our subscription and additional offerings and the efficiency of the bid-auction process for our featured listings placements. We calculate this metric by dividing the average monthly revenue for any particular period by the average monthly number of paying clients in the same respective period.
- **Average Monthly Paying Clients**: We define average monthly paying clients as the monthly average of clients billed each month over a particular period (and for which services were provided).
